

Introducing the

IBEX Vac U Trim System**Clean, Fast and Reliable**

The IBEX Vac U Trim System provides a quick and efficient method of either fat or spinal tissue removal from the carcass surface. It incorporates the proven reliability of the IBEX Trimmer with the powerful vacuum system to ensure continuous extraction and removal of trimmed product.

Utilising a two-tank system, the IBEX Vac U Trim System allows operators to extract product cleanly and efficiently.

The continuous extraction means there are no stoppages or interruptions to production during the removal of waste from the containment tank.

The IBEX Vac U Trim System is custom designed to suit specific plant layouts and processing speeds. Its unique design ensures low maintenance and incorporates a safety system to prevent damage to the vacuum pump.

**IBEX Vac U Trim System - Benefits**

- Custom sized and designed to suit each application from proven and reliable modules
- Continuous operation
- Simultaneously cuts and vacuums
- For use on dura-mater or fat removal
- Extracted product is safely transferred to the storage chambers for disposal
- Customized design to meet the exact requirements of the processor
- Incorporation of the IBEX Trimming System ensures ease of use and maintenance
- Various conical blade sizes to meet the requirements of the processor
- Internal Monitoring System to prevent damage to vacuum pump
