

Modular Trimmer Heads

IBEX lower your costs with interchangeable Trimmer Heads.

All IBEX Trimmer Heads fit all IBEX drive units (both FP & FF, in either Electric and Pneumatic). This modular design approach allows the same drive unit to be used with different head sizes depending on the application that is required, to deliver improved flexibility in production.

IBEX Modular Trimmer heads ensure that the least amount of drive units are required, reducing the total cost of ownership. If requirements should change in the future, don't buy another unit, simply purchase the relevant head, and screw it on.

IBEX Modular Trimmer Heads provide the most flexible approach available in the market today.

- Wide range of Trimmer Heads for all applications (35, 52, 69, 90 & 128mm)
- IBEX Modular Trimmer Heads fit all IBEX drive units
- Single tool maintenance with drive unit for multiple heads
- Lightweight
- Low friction & corrosion resistant blade housing (90 & 128mm)
- Unique easy blade change design (35mm)
- A simple – no tools pinion bush replacement system
- Precise control via depth gauge (options 90 & 128mm)
- Housing mounted sharpening device (Options on the 90 & 128mm heads)
